

A High-Quality Breast Pump is an Important Choice

Most Anthem Blue Cross and Blue Shield plans cover the cost of high-quality breast pumps. Before you place an order, remember to check your coverage and be sure to choose a supplier that's in your plan.

The suppliers listed below are a good place to start when choosing a breast pump. They offer high-quality choices that can help you have a successful breastfeeding experience. You'll be able to choose from popular brands like Ameda, Evenflo, Lansinoh, Spectra and Medela.

Before you order a breast pump, you may need to get a prescription from your doctor, so give us a call at the Member Services number on your member ID card to confirm you have everything you need and your pump is covered by your plan.
