

Smart90® Walgreens Program Reference Guide – Effective 1/1/2018

Now there are two ways to obtain 90-day supplies of maintenance medications: Express Scripts Home Delivery and Walgreens Smart90. Smart90 is a new program that allows you to obtain 90-day prescriptions at Walgreens. Below is important information regarding this program.

Specific Program Details Provided

- **Deductible:**
 - a. Members are required to meet the individual or family retail deductible when using Smart90.
- **Diabetic Supplies:**
 - a. Members are not required to use Home Delivery or Smart90 for test strips. These are covered and can be filled as a 30-day supply at any in-network retail pharmacy or through Home Delivery or Smart90.
 - b. Members must use Home Delivery or Smart90 for glucometers, lancets and syringes and will be subject to the fill penalty on the third fill beginning 1/1/2018.
 - c. Members must still use an in-network durable medical equipment provider through Anthem for insulin pumps and supplies related to the insulin pump only.
- **Maintenance Medications:**
 - a. Members will receive a penalty on the third 30-day supply fill of a maintenance medication subject to Home Delivery guidelines.
 - b. The “fill count” penalty resets for the 2018 Plan Year only. Prior to 1/1/2018, employees who filled a maintenance medication were subject to the penalty per the rules of the Plan Year and the fill count did not reset between years (e.g., members who experienced a penalty for blood pressure maintenance medication in 2016 continued to pay a penalty through the remainder of 2016 and 2017). All members receive a “fresh start” beginning 1/1/2018.
- **Network:**
 - a. All Walgreens pharmacies and affiliates (including Duane Reade™ pharmacies) participate in Smart90.
 - b. The implementation of Smart90 has no impact or changes to the specialty medication process and medications through Accredo.
 - c. To find a Walgreens pharmacy, members may visit express-scripts.com, click “Prescriptions,” then “Find a Pharmacy” or call Express Scripts at 877.207.1357.
- **Prescription Fill Changes from Home Delivery to Smart90 and Reverse:**
 - a. Members are responsible for working with their treating physician to transfer medications from Home Delivery to Smart90. The prescription (i.e., dosage or quantity) will not be filled more than permitted between both programs.
 - b. Members are responsible for obtaining a new prescription to be used for Smart90 and, if needed, cancel their Home Delivery script.
 - c. Members are still responsible for payment of medications dispensed through Home Delivery regardless of when canceled. (Particularly speaking to fills used under the Extended Payment Program or past due balances.)
 - d. Members do not need to take any action if they wish to continue receiving medications through Home Delivery.
- **Pricing:**
 - a. Members will have the ability to price medications for Smart90 as of 1/1/2018 as they can today with Home Delivery.
 - b. Medication costs and drug lists (i.e., brand formulary and non-formulary and generic) are the same for Home Delivery and Smart90.
 - c. Members now have the convenience to pay the same price through Smart90 as they would for a three-month supply through Home Delivery without incurring a penalty.
 - d. Members will NOT be able to use a manufacturer coupon with Smart90 like they do with retail 30 day supply.
